

ROMINA VILLAVERDE BACSKAY

Senior Full Stack Developer

Senior Full Stack Developer with 10+ years of experience in the Software industry. Frontend oriented as I'm also passionate about product and design. Deep analytical thinking and strong attention to the details. Proactive and with a sharp eye to detect areas in the product that can be improved. Fan of writing clean, modular and reusable code. Currently working at MURAL and living as a digital nomad since 2020.

📍 Born in **Argentina**

SPOKEN LANGUAGES

- » Spanish, *native*.
- » English, *advanced*.
- » Portuguese, *conversational*.

EDUCATION

Computer Science

University of Buenos Aires

2006 - 2010

(6 out of 12 semesters completed)

INTERESTS

Photography, travelling, cycling, music.

MOST RECENT EXPERIENCE

Senior Software Engineer @ MURAL | Oct 2020 - Present

I'm part of the Admin team in the Enterprise Pillar. We are in charge of building the dashboard and features for our enterprise customers. Working closely with engineers, product managers and designers in continuous communication, I participate in planning, brainstorming, designing, task-splitting, estimating, developing and delivery of each project.

Some of my main achievements are:

- » Leading the frontend development of important features for our enterprise clients, such as *Guest Domain Restriction* and *Guest Facilitation*.
- » Enhancing our code using best practices, keeping it updated with the latest technology trends and building reusable components to isolate specific functionalities shared throughout the company dashboard, like *event tracking* and *educational callout queue* features.
- » Adding automated integration tests and creating the basis to start adding test coverage for all the features that we own.
- » Onboarding and mentoring new engineers that joined the pillar and facilitated sessions for engineers across the company to explain our architecture and processes.

Freelance Full Stack Web Developer | Sep 2015 - Present

I've participated in different types of projects: building the UI for a virtual classroom using Material design, frontend development for a health insurance PWA, and e-commerce web sites.

- » Worked in teams with designers and backend developers, and also worked end to end from design stage to deploying in a custom server.
- » Designed UI, style guide and reusable components, as well as the database and backend architecture for each project I worked as a full stack engineer.
- » Built RESTful APIs and integrated external services for payments, emails, etc.
- » Implemented advanced text search and filters.
- » Made pixel-perfect implementation of designs and proposed frameworks to improve the performance of the UI.
- » Refactored existing code to make applications more modular, easier to maintain and scale, preventing having unnecessary duplicated code.

BACKGROUND

Innoscripta GmbH

Jun 2020 - Oct 2020

• Frontend Engineer | JavaScript, React.js, Sass.

- » Refactored the code and UI of different sections.
- » Created tables to display high volume of data and dynamic sidebars to show detailed information.
- » Enhancement of scrolling and visual issues in modals.
- » Integration of @react-pdf/renderer library to generate client side PDF files.
- » Created custom radial chart components.

Acámica

Aug 2016 - Dec 2016

• Programming Mentor @ “Aprende Programando” course

- » My first experience in mentoring teenagers that wanted to have their first contact with software development.
- » Taught the students the fundamentals of how web sites, servers and applications work, as well as HTML, JavaScript and CSS for them to build an online resume, a sliding puzzle and a pixel art drawing tool as final projects.

SCVSoft

Jun 2013 - Sep 2015

• Web Developer | JavaScript, HTML, Less, Angular.js, Ruby on Rails, Java

- » Added new features and improved existing ones in the customer’s internal application.
- » Participated in creating a RESTful API for client’s internal use.

Three Pillar Global

Aug 2011 - Mar 2013

• Mobile & Web Developer | JavaScript, HTML, Less, Java, Ruby on Rails

- » Developed mobile (Android & Blackberry) application for a US-based client as well as the web version to manage rules in the mobile app.
- » Participated in the development of a wedding-planner e-commerce website.

Metrogames

Apr 2010 - Aug 2011

• Game Developer | ActionScript

- » Participated in the development of two games for Facebook and Tuenti.
- » Built an internal library to abstract and reuse common features across games.

DINMAX Consulting

Nov 2008 - Apr 2010

• Software Developer | Java, MySQL

- » Developed a Java application for an important call center based in Argentina.
- » I was fully in charge of this project, having close communication with the client, to develop, maintain and deploy the application in their servers.

TeleTech

Nov 2006 - Apr 2008

• Bilingual Customer Care Representative

- » Worked as a bilingual customer care representative for an important account, answering incoming calls to assist customers from all over the United States.
